Average Energy Prices, Chicago-Naperville-Elgin — September 2018

Gasoline prices averaged \$2.990 per gallon in the Chicago-Naperville-Elgin area in September 2018, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that area gasoline prices were up 30.2 cents compared to September 2017 when they averaged \$2.688 per gallon. Chicago area households paid an average of 15.7 cents per kilowatt-hour (kWh) of electricity in September 2018, lower than the 16.1 cents paid in September 2017. In September, the average cost of utility (piped) gas was 85.3 cents per therm, comparable to its average price of 84.7 cents per therm a year earlier. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

The \$2.990 per gallon Chicago households paid for gasoline in September 2018 was 6.0 cents more than the nationwide average of \$2.930. In September a year ago, Chicago area gasoline prices matched the U.S. average. However, in the three prior years (2014-2016) in September, Chicago area gasoline prices surpassed those of the nation, ranging from 14.6 cents to 27.4 cents more. (See [chart 1](#).)

Prices paid by Chicago area consumers for utility (piped) gas, commonly referred to as natural gas, were 85.3 cents per therm in September 2018, 17.2 percent below the national average of \$1.030 per therm. In each of the previous four years (2014-2017) in September, Chicago area utility (piped) gas costs were lower than the national average, ranging from 4.6 percent to 16.8 percent less. (See [chart 3.](#))

The **Chicago-Naperville-Elgin, Ill.-Ind.-Wis.**, core based statistical area consists of Cook, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, McHenry, and Will Counties in Illinois; Jasper, Lake, Newton, and Porter Counties in Indiana; and Kenosha County in Wisconsin.

Historical average energy prices for the U.S. and select metropolitan areas are available at www.bls.gov/regions/midwest/data/averageenergyprices_selectedareas_table.htm.

The Consumer Price Index for October 2018 is scheduled to be released on Wednesday, November 14, 2018.

Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, 9 divisions, 2 population size classes, 8 region/size-class cross-classifications, and the 23 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
